

Who am I?
GEOLOGY

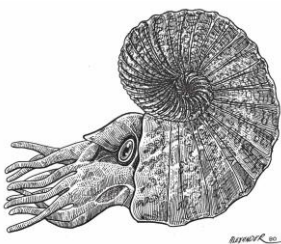

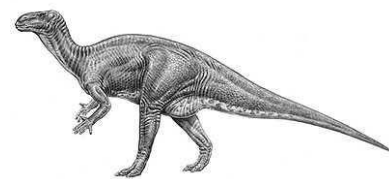

I fell to earth from above
As I flew through the sky I shone so bright
Yet when I landed I look like a small rock

I am a **METEORITE**

I am a common mineral
I come in many colours and sorts
I can be carved and used in jewellery
I am **QUARTZ**

I am a Geological Period.
From about 540 million years ago
Can you see a trilobite from the
CAMBRIAN Period?

I am from the Transitional Period or the
beginning of the Cretaceous Period
I am part of a much larger whole
I am the backbone from an
IGUANADON

Would you have seen me in Jurassic Park?
I lived in the sea; I looked like a flattened snail
But I am more closely related to an octopus
I am an **AMMONITE**

I am frozen in time, in the Oligocene
I was stuck in soft, sticky tree resin
Around 35 million years ago
I am an **INSECT** in **AMBER**

A primitive fish from Jurassic times
You'll find me near the roaring dinosaur
I am the fossil of an **ICTHYOSAUR**

I look like the jaw of a modern mammal
But I am from 130,000 years ago
Alive I was large and ponderous
I am the jaw of a
NARROW NOSED RHINOCEROS

I am part of a fossilised tooth, but I don't look like a tooth
I am from an animal which lived in the Pleistocene Period
I am a **MAMMOTH TUSK**

I am another geological period
About 251 million years ago
A time when Britain was covered in hot, dry desert
Can you find the lizard footprints from this time?
I am the **TRIASSIC** period.
